Mobile phone:

Graduate student(s) or staff associated with this project:

Project Name:

Type of Funding:

Please identify the funding source supporting this research, i.e. NHAES project #, USDA project #, UROP award (student name), etc.

Accounting Fund/Org:

Approximate greenhouse space requirement:

..... Square feet per month

Months requested for space:

..... e.g. August - October, 2014

..

Will the proposed project require classroom, lab or other space in addition to greenhouse space?
If "Yes," please explain:

Please provide a short description (Why? What? How?) of the proposed project that would be appropriate for including in the NHAES Annual Report:

Materials and Methods. Please describe briefly any required treatments, advance preparations, intended measurements or sampling, etc.:

Does the project generate plant material that requires special handling (pathogens, insect pests, genetically modified, etc.)? If “Yes,” please explain:

Are there potential environmental risks associated with this project? If “Yes,” please explain:

Special Requirements:

- Temperature range preferred (°F): day _____, night _____.
- Is day length critical?
If “Yes,” please explain:
- Will you require photoperiod or supplemental lighting?
If “Yes,” what is the day/night ratio? _____ hour day / _____ hour night.
- Fertilizer needed (standard is 15-4-15 CalMag at 150 ppm N)?
- Will additional support of greenhouse staff be required in any way other than basic watering, fertilizing, and pest and disease management?
If “Yes,” please describe the additional support requested:

- Will the greenhouse space need to be modified in any way other than the standard bench arrangement? **If yes, please describe the proposed modification:**
- Other requirements (special fertilizers, particular pest or disease concerns, etc.):

NHAES/COLSA response, including any stipulations, etc.:
