Program Overview
The Bachelors in Science (B.S.) degree in Sustainable Agriculture and Food Systems is designed to combine a strong foundation in the biological sciences with a broad base of knowledge and experiences related to modern agricultural and food systems. The Bachelor of Arts (B.A.) degree in Sustainable Agriculture and Food Systems is designed for students interested in obtaining a well-rounded education in this area. The program will be particularly suited to those interested in having the flexibility to take courses from a variety of disciplines or pursuing a dual degree, second major or minor. This major draws upon the diverse course offerings by the three academic departments in the College of Life Sciences and Agriculture and the Thompson School of Applied Science as well as those from other colleges at UNH.
