Department of Biological Sciences
Graduate Student Seminar Series

OCTOBER 5
Kaitlin Van Volkom & Valerie Eddington
Prey population effects on crustacean predators & Using acoustics to monitor dense aggregations of animals

OCTOBER 12
Miguel Gomez Garcia & Nathan Hermann
Quantifying manta ray behavior & Species model development using bioenergetics

OCTOBER 19
Melanie Smith & Lizzy Martin
Vessel noise impacts on marine mammals & Ammonia uptake in aquaculture systems

OCTOBER 27
Sierra Walsh & Alex Sangermano
Alzheimer’s Disease effects on mice behavior & Nekton restoration in Great Marsh Estuary

NOVEMBER 3
Aliya Caldwell & Kyrie Newby
Seabird movement & Anthropogenic noise impacts on mussels

Please join us on Thursdays from 1-1:45pm in Rudman G89 or on zoom
