

**\*\*\* 2026 Pricing \*\*\***

Dear NHVDL Clients,

We hope that 2026 will be a healthy year for you and your patients. Thank you for the opportunity to meet your diagnostic needs.

It has been two years since our last price adjustment and during that time we have all experienced a rise in operational costs.

We remain dedicated to providing you with prompt, affordable and quality results, while continuing to bring on board the latest technologies and additional staffing to achieve the best quality and turn-around-times.

We view affordability as an important part of diagnostic stewardship in order to protect animal and human health. Whether it be a necropsy or antibiotic susceptibility, we want our services to be in reach for your clients.

Thank you for your continued patronage. If you do not currently use the NHVDL, give us a call and set up an account today. Your support helps to advance our mission and bolster the animal health infrastructure in our region.

We would love to hear any suggestions you might have on how we can better serve you. If you are ever in the area and have not had a chance to see our lab, please stop by for a tour, it would be great to see you.

Kind Regards,

Robert Gibson  
Managing Director  
NH Veterinary Diagnostic Laboratory
